

Examples from Reddit—mostly from the /r/sex subreddit—of misinformation or disinformation typically being upvoted and going unchallenged, along with examples of omission (e.g. no one pointing out the possibility of a preexisting condition, saying something like “doing that is a bad idea,” mentioning the extreme danger of “rough” anal intercourse/insertions – including potential lethality plus likely criminality when more than one person is involved, etc.), can be seen in subreddit threads referenced below. All of the original URLs should be archived on archive.today and/or web.archive.org (and some of the threads, or at least the original posts, no longer are present on Reddit; archive snapshots sometimes disappear as well). Notably, Reddit’s /r/sex subreddit has enshrined the “sex-positive” bias into its posting rules.

Note: The archival date of a snapshot present on one of the archive sites mentioned above does not necessarily reflect the age of the archived URL: Some old threads might have been archived years later for instance. Also, for newer material old.reddit.com is favored over www.reddit.com.
